Mark

Thank you for allowing the community to comment on the Notice of Preparation.

There were many comments concerning very important issues of concern to the community as a whole and specifically to the local neighbors to the proposed project. There were equally important issues raised to the design of the project. I will not reiterate those issues, but simply mention the following item:

- In the section of the EIR that is headed by Aesthetics please evaluate the impact to the view corridors from both the public right-of-way, Marina Park, and private properties fronting 1st Street and other properties that may have a current view to the inlet channel and beyond. Providing line-of-site illustrations both before and after the proposed development as it is currently designed would be helpful.
